FAST BRIEF ABOUT GPN

GPN COIN is a coin for the gambling and porn network and the issue that we wish to solve is the fast transaction issue that those types of websites have and also the Anonymous Issue that users suffers from when they want to stay anonymous and to do fast transactions on the gambling and porn sites.

Our Block chain will be anonymous and highly Secured in Order to make sure all transaction will stay on the same GPN Network and the network will be anonymous and fast transacted between users. Each user will have id number and he will not need to login with email or phone or name! Login and authentication will be with id and password and GPN (Gambling Porn Network) will be safe and anonymous for all users.

Users that will buy tokens of GPN will need to fill up a form and when we finish development of the wallet and block chain, user will login with his id and password that he set while register in PRE ICO Or ICO and they will see the coins that they bought in the secure anonymous wallet.

Our technology will be based on **ERC 20** and we wish to start development when we finish the PRE ICO and ICO.

GPN aims to create a Profit Sharing platform built on trust and reputation with the Gambling and Porn Network (GPN) ecosystem. Security is the first priority within our decentralized platform. We utilize the popular **ERC 20** block chain technology allowing other developers to join seamlessly and without worry. GPN contributes to redefining the core trends of crypto currency in the present and future to generate positive changes in the way that crypto is viewed & admitted in the next 10 years.

We need to raise 20 million dollar in total for development project.

Our goal is to sell the 240,000,000 Coins in ICO and Pre ICO.

We will keep 60,000,000 to team, advisors and marketing companies

We are now in negotiation with more than 500 gambling and porn companies and we already have several approvals of companies for using GPN

1. PURPOSE

Become the largest and most trusted decentralized
Gambling and Adult network in the world GPN.

2. PROBLEM

Your Gaming network, Your Adult Network, your online activity, and even your online presence are a 100 billion dollar industry curated by the very companies you trust to guard your privacy.

Don't you think It should be Easier and more anonymous to Play Online or to Watch Adult Content without Footprint?

These large gaming companies have created a platform for gaming and adult but only thing that they didn't created is Anonymous behave to those who want to stay Anonymous online

Why they should Know Who We Are? We Want To Stay Anonymous!!!

The truth is they shouldn't. GPN Coin has the answer!

[GPN COIN](#) was built on the idea that privacy, User transparency, and data security should be blocked for Several Industries like gaming (casino/poker/bingo/sport/lottery/porn/adult/etc) and adult industry.

So we believe that the Billions those corporations are keeping this data to share it with the government and also they can hold you in the balls if they want to, it belongs to you and you only.

We want to help you take back the control and have a say about your privacy.

So we've created a decentralized Anonymous network, separate from those corporations that allow exactly that. You have a say, you get compensated, and above all you take back the power with every click and every social connection.

More than simply connecting truly discover...

**Help us break apart their Public system by joining the digital
Revolution Today! JOIN GPN COIN!**

2.1 The Current Method of Online Publicity for Gaming and Adult Reveal the Users When they want to become paid Users

While users play in demo mode they stay Anonymous but when they want to become premium users they need to pay and for that those gaming and adult companies don't have privacy and they by force make the users upload identifications like passport copy or id copy so they could know more about you before you pay them with some payment method like credit card or PayPal that knows all about you before they approve you!

By using **GPN** COIN they will not need to know who you are anymore! You will be able to pay them and still stay Anonymous

We got to conclusion that the only way for keeping the users safe and Anonymous will be by GPNCOIN as only in payment those specific companies demand your identity!

We already have negotiation with the biggest exchanges worldwide to be published at June 16 and also we have negotiation with more than 500 gaming and adult companies and already started integration with them in order to go live on June 16 to their gaming and adult platforms as official payment methods

3. SOLUTION

Since its early inception, Anonymous network has quickly gone from a simple novelty used only to keep friends updated and included on our daily lives to becoming a growing source of entertainment, gaming and adult. And as nearly 1 billion people now utilize gaming and adult network in some shape or form, its impact on life cannot be denied. From those nearly 1 billion active users, volumes upon volumes of data are generated, saved, and often sold to the highest bidder. Essentially selling people's personalities, secrets, and lives to corporations that utilize that information to create targeted ad campaigns. And this happens every moment of every day.

GPNCOIN aims to change that and redefine how gaming and adult network and behave interacts within our lives! Stay anonymous.

GPNCOIN is more than just an anonymous network for gaming and adult!

GPN is so much more than another simple addition into the growing line of gaming and adult networks available. It is the beginning of a digital revolution.

This brand new form of crypto currency can be used for a wide variety of uses and can even be utilized to fund grass roots campaigns and movements, allowing them to reach more people and larger audiences. To celebrate the launch and welcome the coming digital revolution, GPNCOIN is holding an open offering to those entire ready to join something special and different. This special occasion, only available now, will set the precedent for the entire value of the GPN. And once it's over, no more GPN tokens will ever be produced.

So if you are ready to be a part of something special and ready to take the power back, join us in the digital revolution.

4. OPPORTUNITY

Consumers demand for better privacy and data protection has created a demand for a service that puts control, profit, and privacy back into the hands of the consumers. We are poised for yet another great disruption in marketing and advertising. The old and increasingly ineffective method of advertising will come to an end. The old way will be replaced by the next waves of innovation.

At the forefront of the wave, GPNCOIN has positioned itself ready to disrupt the old process. We will create more transparent and open methods for conducting business in today's global market. GPNCOIN innovative technology creates a scalable, anonymous, and secure secured network utilizing large amounts of data while still ensuring privacy.

WHAT CAN I DO WITH GPN?

In-system tokens to be used by consumers

In addition to the benefits laid out in this paper, GPNCOIN is introducing an innovative incentive program for consumers using tokens. These Tokens are used throughout the system in order to facilitate transactions within the gaming and adult network

Put the power back into your hands

GPN tokens are crafted in such a way that the entire process is secure yet transparent. This process leads to a greater sense of trust within the system

5. ABOUT GPN

GPN is a digital currency designed to be used within GPNCOIN Network– a *new, private, and secure platform* that offers an integrated, decentralized market, complete with its own secured platform.

6. GPNCOIN NETWORK ADVANTAGES

- **We have a strategic plan** that puts our users and token holders first.
- **We have a segregated** cloud server environment that is safeguarded using cutting edge security systems.
- **We will offer a superior** user experience and superior customer support for the users in our ecosystem. Our team designs the system for scalability.
- **We offer anonymous transactions globally.** Because we do not transact with banking institutions, we do not require ID verification. Everything is done using
 - digital currency.
- **We have an experienced** and capable team that can manage complex technologies and business challenges.

7. ESTABLISHED PRODUCT

The GPNCOIN **Anonymous Network** incorporates modern technologies that secure the most popular features used in today's privacy networks.

We have an experienced team and a product that is already built. Our team has many years of experience designing systems that are secure and capable of managing high volumes.

The GPN platform can currently be found on the internet

8. STRATEGY

*Through the invention of the internet, businesses found a more
Convenient way of protecting customers with GPN.*

As we are about to enter the fourth decade of using computer networks, the ways in which advertisers reach their targeted audiences have not undergone much innovation.

Despite the poor results, many advertisers still use the old methods to advertise their products. Businesses still elect to waste funds that could be allocated towards more effective marketing.

The unfortunate truth is that many businesses are wasting precious funds to reach potential clients. The entire process undermines the experience between consumers and businesses.

We see consumers who are less likely to respond to the constant barrage of unwanted advertisement. Both parties gain nothing from the entire experience.

In direct response to this ever expanding problem, GPNCOIN has set out to reduce the need for such intermediaries while increasing companies' ability to directly reach their desired target audience.

Using GPNCOIN innovative decentralized Gaming and Adult network allows businesses to keep the customers anonymous, and both sides stand to gain. On the consumers' side, we see an increase in privacy as their browsing habits and online acts in gaming industry and adult industry are no longer sold to the highest bidder. Companies benefit from knowing that their customers remain anonymous and they don't need be demands by organization of several governments

9. MARKETPLACE

The GPNCOIN anonymous platform contains important ecommerce features. The marketplace will allow users stay anonymous and no one will even know that they use GPN in life

10. TRANSPARENCY

GPNCOIN will safeguard user privacy and avoid the misuse of community data. When there is a need for additional development, everything will first be presented to the community.

GPNCOIN goal is to be the anonymous platform where data is owned by the users. The community drives the network

11. ICO DETAILS

A total of 80% of available tokens will be made accessible to buyers through the PRE ICO and ICO. We've reserved 20% of all tokens for our team and advisory staff and marketing Staff

At the Initial Coin Offering, 0.05\$ = 1 GPN.

300,000,000 tokens will be created.

Should tokens go unsold, they will be destroyed.

12. DISTRIBUTION OF FUNDS

- 240,000,000 TO PRE ICO and ICO
- 60,000,000 TO Team, Advisors and Marketing Companies
